

Polypropylene wax powder

S-337

Performance and use:

- It has extinction property
- Provides dry smooth coating feel
- The friction resistance is better than that of polyethylene wax
- Excellent adhesion resistance
- Easily dispersed in various resin systems

Product specification:

Model number	S-337
appearance	White powder
Particle size	5 microns (D-50)
Density (g/cm ³)	0.98
Melting point °C	160
hardness	<1dmm

system	Polypropylene wax powder can be applied to coating with high wear resistance requirements, suitable for solvent-based wood paint/roll steel seal iron paint /, and also suitable for powder coating with high wear resistance requirements
ingredient	Polypropylene wax powder

Packing specification:25kg paper bag packing
