

Water-based oxidized polyethylene wax emulsion

S-3235

Performance and use:

1. It has a good anti-sticking effect
2. Play anti-friction, increase wear resistance, increase smoothness and gloss
3. Improve surface hydrophobic and anti-fouling performance
4. It has good anti-sinking effect

Product specification:

Model number	S-3235
appearance	Yellowish emulsion
ingredient	Oxidized polyethylene wax
Wax liquid system	nonionic
Melting point °C	115
Solid inclusion	35±2%
PH	8

Apply	S-3235 wax emulsion is suitable for all kinds of water-based coating system, water-based polishing oil, water-based finishing oil, leather finishing agent, textile printing paste, water-based wood paint, water-based latex paint, water-based adhesive, water-based release agent
Additive amount	1-5%

Packing specification: 50kg plastic drum packing
