

Levelling agent

RF-7611

Features and advantages:

1. For water-based, solvent-based coatings can provide smooth feel on the surface of the coating, especially the wear resistance of the UV system. Improve paint leveling, wettability, reduce orange peel.
2. Can prevent pinholes and fisheye.
3. Can be used as leather resin modifier to improve resin feel and anti-viscosity.

Physicochemical property:

appearance	Clear amber liquid
Solid content	100%
solvent	None
Specific gravity	1.037
Viscosity,cs	300

Usage: Generally added in the final dilution stage and color matching stage

Addition amount: The general addition concentration is 0.2-1%.

Storage conditions: Sealed storage below 25°C, product shelf life from the date of production is 24 months

Packing: small drum 25KG/ drum, large drum 200KG/ drum

Note: This product is flammable, away from sparks, heat sources. It has an irritating effect on the skin and eyes, and should be avoided for a long time.
