

Can be reapplied stripping agent

RT-3145

Features and advantages:

This product is in the field of water transfer removable film application, specially developed to solve the difficulty of recoating stripping agent, this product has efficient stripping effect and solves the recoating problem caused by the use of ordinary silicon-containing stripping agent in the market. This product added less, yellowing resistance, excellent stripping, excellent compatibility, does not affect the transparency of the coating, does not affect the drying speed of the coating and the toughness of the coating after the film.

- 1、 the effect of improving the peeling force of the tear-off coating is significant
- 2、 excellent recoating effect, compatibility.
- 3、 can effectively prevent the occurrence of watermarks, water strips, water spots, drag lines, oil spots and other ills in production

Product specification:

appearance	Light transparent liquid
Active ingredient	100%
Viscosity (25°C, mPa.S)	200-400.
ingredient	Modified polymer non-silicon compounds

Application: acrylic, polyurethane, nitro system

Recommended dosage: 1-4% of the total formula

Usage: Add method without special requirements, stir well.
