

Dispersant

RD-9610

Features and advantages:

RD-9610 is a mid-level polymer dispersant, which has good dispersing effect on carbon black, organic pigment and inorganic pigment in solvent based industrial paints and inks. Good versatility, and most of the resin system has a very good compatibility; For the dispersion of inorganic filler, it has the effect of obviously improving the stability of filler.

Product specifications:

| | |
|-------------------------|-----------------------|
| appearance | Brown viscous liquid |
| Non-volatile portion of | 99±1% |
| The proportion of | 0.95g/cm ³ |
| chroma (W. Gardner) | ≤13 |
| The boiling point | 200°C |
| Flash point | 258°C |

Application scope:

1. Disperse grinding common carbon black, organic and inorganic color filler in industrial paint and other coating systems;
2. Disperse grinding carbon black, organic and inorganic pigments in a variety of ink systems;
3. PVC/PU color paste system organic pigment and carbon black dispersion.

Usage: dissolve RD-9610 in the mixture of grinding base material first, and then add pigment for grinding.

Packing: net weight 25Kg/ drum, 200kg/ drum

Storage:

- 1, away from high temperature and fire;
- 2, placed in a cool and ventilated place;
- 3, please seal after use;
4. Shelf life is 36 months.
