

Substrate wetting agent

RK-TG

Features and advantages:

RK-TG is a low-bubble, non-ionic surfactant and wetting agent. Used as pigment wetting agent and substrate wetting agent for water-based systems.

1. Improve the wetting ability of pigments
2. Improve color rendering
3. Reduce paint grinding time
4. Improve coating color uniformity
5. Low blister
6. Reduce water sensitivity problems

Product specifications:

Appearance	Light yellow transparent liquid
Cloud point /°C (10%in25%BDG)	47
Active ingredient	69%

Application scope:

Pigment wetting

Substrate wetting

Packing:

25KG non-recycled blue plastic drum. The product is not completely used, need to tighten the lid after use.
