

## Non-silicon defoamer

### RP-6203

#### Features and advantages:

This product has efficient anti-foam and anti-foam ability, only a small amount of addition is required to achieve excellent results. Suitable for a variety of systems, a variety of viscosity of paint and ink adhesives, is a new generation of strong defoaming ability, solvent-free defoaming agent.

1. Solvent-free environment-friendly defoamer.
2. Excellent defoaming and defoaming ability in any system.
3. In the high viscosity, thick coating system such as epoxy floor, screen ink, etc., also has a good defoaming effect

#### Product parameter:

Appearance	Thick, clear liquid
Effective portion	100%
Ingredient	Non-silicon compound

#### Application field:

Thermoplastic acrylic system, polyurethane system, epoxy system, amino system.

#### Recommended dosage:

0.1-2% of the total formula

#### How to use:

Dilute with a suitable solvent and add to the system

#### Packing:

25KG/ barrel, 200KG/ barrel

#### Storage:

Keep away from fire, light source and away from light.
