

Wetting dispersant

RD-9716

Features and Advantages:

RD-9716 is a kind of high polymer dispersant, mainly for inorganic pigments (extinction powder, talc, barium sulfate, etc.) grinding dispersion, has excellent wetting dispersion and anti-sedimentation effect on pigments, and has good compatibility with other resin pigment system, especially for UV wood paint extinction powder dispersion and anti-sedimentation.

Product Specifications:

appearance	Pale yellow viscous liquid
composition	High polymer block polymer with pigment loving group
Valid copy of	100%

Scope of application:

1. Grinding and dispersing of inorganic pigments (especially extinction powder, fillers, etc.) in coating and paint systems;
2. Dispersion stability of inorganic fillers.

Recommended dosage:

Inorganic pigments	1.0-5.0%
Filler such as talcum powder	0.5-2.0%

Usage:

RD-9716 was dissolved in the mixture of grinding base material, and then pigment was added for grinding.

Packaging: 25KG non - recyclable blue plastic bucket. The product is not completely used before, need to tighten the lid after use.

Storage: Keep away from fire, light source and light.

Note: Please carefully evaluate before use, suitable for matte furniture paint, can also be applied to light.
