## Water-based wax dispersion

### S-6435

#### Performance and use:

1. Play anti-friction, increase wear resistance, less impact on luster
2. It has a good anti-sticking effect
3. Improve surface hydrophobic and anti-fouling performance
4. The emulsion has good stability

#### Product specification:

Model number	S-6435	S-6535
appearance	White emulsion	White emulsion
ingredient	High density oxidized polyethylene	High density polypropylene wax
Solid inclusion	40±2%	40±2%
Melting point °C	118	180
PH	7-9	7-9

system	S-6435 Water-based wax dispersion is suitable for various water-based paint systems, water-based polish oil, water-based polish oil, water-based finish oil, leather finishing agent, textile printing paste, water-based wood paint, water-based adhesive, water-based release agent	S-6535 water-based wax dispersion has higher scratch resistance and smooth performance than S-6435, which is suitable for various water-based coating systems, water-based glazing oil, water-based polishing oil, water-based coating oil, etc
Additive	1-5%	1-5%

**Packing specification:** 50kg plastic drum packing
